

WORKERS & SMALL BUSINESSES

“Unorganized Daily Workers Problem”

Problem: Electrician, plumber, painter ko kaam milta hai par continuity nahi hoti.

Why unsolved: Urban apps rural/local workers ke liye practical nahi.

Solution: Simple local worker job-matching app – No English required – Voice + WhatsApp based – Repeat customer system I select this project.

PROJECT TITLE (Final)

“RozgaarSetu – Local Daily Workers Job Matching Platform”

A voice & WhatsApp-based job continuity platform for unorganized local workers.

1 PROBLEM STATEMENT (As it will go in Report)

Background:

India me crores of daily workers (electrician, plumber, painter, carpenter etc.) hain jo **skillful hone ke bawajood** stable kaam nahi paate.

Core Problem:

- Kaam **irregular** milta hai
- Customers ko **trusted local worker** nahi milta
- Existing apps (Urban Company etc.) **English-based, complex aur urban-centric** hain
- Rural & semi-urban workers **technology se cut-off** hain

Impact:

- Income instability
 - Skill waste
 - Customers ka time & trust loss
-

2 PROPOSED SOLUTION

Solution Overview:

RozgaarSetu ek simple, local-language, voice & WhatsApp based job-matching platform hai jo:

- Local workers ko nearby customers se jodta hai
- Repeat customers enable karta hai
- Worker ki **job continuity** improve karta hai

Key Philosophy:

“Technology worker ke liye simple honi chahiye, worker technology ke liye nahi.”

3 FEATURES (Very Important for Viva)

Worker Side

-  Phone number se login (OTP), OTP via WhatsApp
-  Voice-based profile creation
-  Location auto-detect
-  Skill selection (icons)
-  WhatsApp job alerts
-  Rating & repeat customer history

Customer Side

-  Nearby workers search
-  Skill-wise filtering
-  One-click call / WhatsApp
-  Repeat booking option
-  Simple feedback system

Admin Panel

- Worker verification
 - Fake profile control
 - Area-wise analytics
 - Dispute management
-

TECH STACK (MERN)

Frontend

React + Vite, Next.js

- Fast build
- Component-based
- Modern UI

Backend

Node.js + Express.js

- REST APIs
- Auth & logic handling

Database

MongoDB

- Flexible schema
- Worker/customer collections
- Geo-location support

Other Tools

- WhatsApp Cloud API
 - WhatsApp OTP
 - Cloudinary (images)
 - Google Maps API
-

5 PROJECT STRUCTURE (Pages & Flow)

PUBLIC PAGES

1. Landing Page
 2. Select Role (Worker / Customer)
 3. About Platform
 4. Contact / Help
-

WORKER MODULE (Pages)

1. Worker Login (OTP), OTP via WhatsApp
 2. Voice Profile Setup
 3. Skill Selection Page
 4. Location Confirmation
 5. Job Alerts Page
 6. Booking History
 7. Ratings & Feedback
-

CUSTOMER MODULE (Pages)

1. Customer Login
 2. Location Detect Page
 3. Select Service Page
 4. Worker List Page
 5. Worker Profile Page
 6. Booking Confirmation
 7. Past Bookings
-

🔧 ADMIN MODULE

1. Admin Login
 2. Worker Verification
 3. Analytics Dashboard
 4. User Management
-

6 MODERN & ATTRACTIVE UI SUGGESTIONS 🧠

🎯 UI Style

- Minimal
- Large buttons
- Icons > Text
- Local language (Hindi default)

🎨 Colors

- Primary: Green / Blue (Trust)
- Secondary: White / Light Gray
- Accent: Orange (CTA)

🌐 UI Inspiration Sites

- <https://dribbble.com>
- <https://behance.net>
- <https://mobbin.com>
- <https://uimovement.com>

🌿 Icon Packs

- Lucide Icons
- Heroicons
- Icons8 (workers icons)

UX Tricks

- Voice prompts
- Progress indicators
- No long forms
- WhatsApp redirect buttons

7 FUTURE SCOPE (VERY IMPORTANT)

- AI-based job recommendation
- Regional language expansion
- Offline mode (SMS based)
- Micro-loans for workers
- Government skill programs integration
